

There are no more reasons to use paper based randomization systems.

Our clients are looking for a simple, easy to use randomization solution that can provide a link between the enrollment of the patient and the management of the supplies. WebEZ™ was developed with these requirements in mind.

WebEZ™ can be set up in DAYS, is cost effective and offers an automated randomization solution for trials that cannot justify a full IVR system. What's more, WebEZ™ is built and managed by the same project manager who is handling your packaging and distribution needs.

Is your study a good fit for WebEZ™?

TIME IS CRITICAL

YOUR TRIAL IS USING A MANUAL OR PAPER BASED SYSTEM

WHEN IMPLEMENTING A FULL IVRS IS NOT COST EFFECTIVE

One company, one project manager handling your randomization, packaging and distribution requirements

Benefits of using WebEZ™ system

- **Rapid set up**
As the system is configurable, it can be available in DAYS after signing specifications. This is ideal for trials where timing is of prime importance. Average setup time is 3 days
- **One Project contact**
The Project Manager that builds your WebEZ™ System, will also manage the packaging and distribution aspects of your project
- **One stop solution for supply chain management**
All inventory information contained in ONE database. Streamline your supply chain-multiple vendors not required!
- **Cost effective**
Priced appropriately to be an alternative to manual systems or simple trials that cannot justify the expense of an MRS

WebEZ™ FEATURES

- **Screening**
Allows entry of eligible, ineligible patients
- **Enrollment**
Register eligible patients

- **Randomization**
Randomize patients to a treatment arm
- **Patient resupply**
Assign supplies at follow up visits
- **Unblinding**
Unblinding of patients

REPORTS

- A full suite of reports are available to sites and clients

- Clients can download reports as CSV files
- Reports are available and fully functional when your system becomes live

DRUG SUPPLY MANAGEMENT

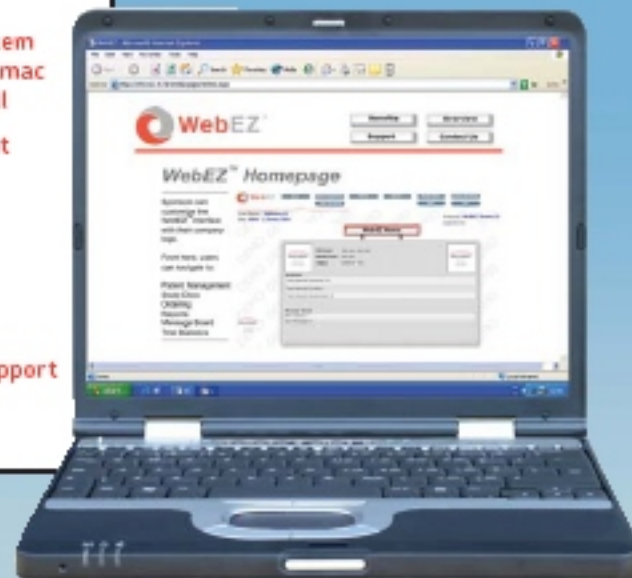

Your project manager will use enrollment information from WebEZ™ to plan packaging operations and forecast drug usage

SECURITY

- The WebEZ™ system sits within the Almac corporate firewall
- Part 11 compliant
- Audited by an independent security firm.

SUPPORT

- 24/7 WebEZ™ support centre for all of our clients
